FIG. 6 is a block diagram of a system architecture for loan origination and acquisition. The system includes a Loan Origination Computing System 603, a Loan Acquisition Computing System 650, and an Internet 699. The Loan Origination Computing System 603 includes a Loan S/W 607, which in turn includes an Origination I/F 610. The Origination I/F 610 includes a Remote Loan Application Entry 612 and a Local Loan Application Entry 614. The Loan S/W 607 also includes a Processing Engine 620, which includes Profile Parameters 622. The Loan S/W 607 also includes a Portfolio/Profile Manager 630 and a Remote Parameter Retrieval 640. The Loan Acquisition Computing System 650 includes an Acquisition S/W 655, which includes a Processing Engine 660 and Profile Parameters 662. The Acquisition S/W 655 also includes a Portfolio/Profile Manager 670, a Parameter Delivery 680, and a Remote Offering I/F 690. The Loan Origination Computing System 603 and the Loan Acquisition Computing System 650 are connected to the Internet 699.
